

User Manual

SAR Transaction Information System

SAR Transaction Information System is designed for the authorized personal of the vary Organization to use. The personal can search for the transaction made by stating the total price of the transaction or by providing the transaction type(import or export) along with the product category(Food, Vehicle etc.).

The detailed user guide is given below:

Add a new transaction in the table:

1. Provide the system with all the necessary fields as required by the GUI which are:
 - 1.1. Name of the transacted product
 - 1.2. Type of the transaction made
 - 1.3. Manufacturer of the product
 - 1.4. Category of the product
 - 1.5. Quantity of the product
 - 1.6. Price of the product(price per piece/kg/liter)
 - 1.7. Date of the Transaction
2. Press 'ADD' button in the GUI.

Update an existing transaction

1. Select the row of the transaction to be updated in the table.
2. The data of the selected row are extracted in their respective fields.
3. Change any data and press 'UPDATE' button in the GUI.

Search transaction based on price

1. Enter the amount (total price) of the transaction
2. Press search icon in the GUI to search for the transaction.

Find the product according to category

1. Select the transaction type of the product.
2. Select the product category.
3. Press 'Search' button in the GUI.
